Component: _Orbitz

Test Case Designer: Lane Pollock

Creation Date: 07/15/25

Modified By: _____
Modified Date: _____

Requirements Covered:

REQ002

Test Description/Purpose:

To lead user in booking a flight from Denver to Dallas using Orbitz

Pre-Test Conditions:

User has a computer with access to the internet, that is also compatible with Orbitz' website

Test Steps:

#	Description	Expected Result	Check (✓)
1	Open up search engine	Search engine opens and is ready for input	
2	Type 'Orbitz' in the search bar	Results for Orbitz search will load and populate the search results page	
3	Choose the website 'orbitz.com'	The Orbitz page loads	
4	Navigate to the 'flights' tab and select it	Options for entering the departure location and destination load	
5	Where it says 'Leaving From', type in Denver and choose the airport	The box should update and show Denver's airport	
6	Navigate to the 'Going to' box, select it, and type in 'Dallas'	The going to box will update and show the Dallas airport	
7	Choose a good date, and press 'search'	Results load for flights at that time that fit the criteria	

8	Choose a flight that works, and press 'select'	The flight will add to the cart and prompt for payment
